Action Based Learning™ Lab Manual

\$99.00

The Lab Manual is a 78 page comprehensive description of the Lab components, the brain theory that supports the Lab concepts and pictures and directions for each progression of each station.

Brain Rules by John Medina

\$34.95

Dr. Medina lists 12 brain rules for thriving at work, school, and home. Exercise boosts brain function is number one on the list. Other rules include that men and women's brains are different. Stressed brains learn differently. We don't pay attention to boring things. This is an easy read for the "beginning neuroscientist".

Thinking on Your Feet

\$45.00

Thinking on Your Feet has over 200 lesson plans using kinesthetic teaching strategies to teach academic concepts in reading, writing, math, social studies, and science. The lessons are organized according to Gardner's Multiple Intelligences, basic brain concepts, and national standards in each of the major subject areas. The advocacy information included supports the need for daily quality physical education in our schools. Brain research information and brain game activities give the teacher the basis how to put learning into action in the gymnasium or classroom with students thinking on their feet!

Energizing Brain Breaks with DVD by David Sladkey

\$27.00

Brain Breaks are quick 1-2 minute activities which will help you get re-focused and energized. Each of the 50 activities will challenge your brain while at the same time get you to move your body. Energizing Brain Breaks can be used at home, in the office, in a classroom or while traveling. The DVD is a collection of 50 quick activities that you can see in action. The DVD has videos that match the book "and are 1-2 minute brain and body challenges that are fun and help you regain your efficiency. The videos include all age ranges including elementary students, junior high students and high school students.

The Kinesthetic Classroom by Traci Lengel & Mike Kuczala

\$41.95

Current research shows that regular physical activity helps children and teenagers perform better in school. Drawing on cutting-edge educational research, the authors describe how regular physical movement improves attention span and helps the brain master new information. Readers will learn how to use short activity breaks to refocus students and how to enhance the academic curriculum through movement-based games.

Spark! by John J. Ratey, MD

\$24.99

SOFTCOVER ONLY

Dr. Ratey's book is filled with neuroscience studies that explain the link of exercise to improved student performance. He explains how exercise impacts learning, addiction, ADHD, aging, hormonal change, and stress.

This a "must-have" book for teachers, administrators, and parents.

DVDs

Action Based Learning™ Keynote DVD

\$23.00

See Jean in action as the featured keynote speaker at the Harris County Schools Early Childhood Conference in Houston, Texas. The hour long DVD provides information about the neuroscience of how children learn and the activities that anchor the concepts. The visual learner will enjoy seeing the information come alive! This DVD is not only for early childhood teachers, but also for all teachers who love to see students succeed!

How to Make Learning a Moving Experience DVD

\$23.00

The hour long video was created by the Virginia Department of Education as a staff development tool to help teachers teach academic concepts kinesthetically. The first segment features information about how brain research supports the link of movement to learning and how and why physical activity enhances learning. The remainder of the video is Jean Blaydes Madigan teaching students of different grade levels in different teaching venues in the classroom, gymnasium, and music room. The manual provides the lessons presented in the video in their entirety. This is a must see video showing how the brain research translates in to classroom practice and how to make learning a moving experience!
